THE GILLMANS OF HIGHGATE, WITH LETTERS FROM SAMUEL TAYLOR COLE-RIDGE. Illustrated with Views and Portraits Being a Chapter from History of the Gillman Family. By Alexander W. Gillman. Pp. 53. (London: Elliot Stock.)

Alexander W. Gillman, a grandson of the dis tinguished surgeon who sheltered Coleridge for many years, has written an elaborate work, entitled "Searches into the History of the Gillman Family, Including the Various Branches in England, Ireland, America and Belgium." The narrative begins with earliest times, tracing the descent of the Gillmans or Gilmans from Coel Godeboc, who is said to have been King of Britain about 300 A. D., down through Gilmin Troed-dhu in the ninth century; John Gylmyn, King's Marshal in the reign of Henry III, and the Gylmyns or Gilmans of Tudor times, and so onward to the present day, illustrated with coats-of-arms, ancient wills, pedigrees and the like. The chapter most likely to be of general interest-that is, the one relating to the residence of Coleridge with James Gillman, surgeon, at Highgate, as above indicated-has been printed separately, with portraits of Gillman, Coleridge, Mrs. Gillman and the Rev. James Gillman, who grew up to manhood while Coleridge was in his father's house. his reminiscences of the poet and philosopher is very characteristic. Coleridge loved so well to talk that he would unload his heaviest metaphysics on any one who would listen, on "a young lady of seventeen," as one of his visitors marked, thinking of an example within his own observation. Young James Gillman went to him one day for advice about a school exercise, and got forthwith a lecture on the subject, beginning with the Creation. After that he rather avoided his learned mentor

It is a curious thing that every now and then some literary person starts up with a fling at the Gillmans about their treatment of Coleridge. These flings do not seem to be malicious, but merely the side-giances of a criticism which pretends to omniscience. A short answer to all of them would be to ask how many persons there are in any community that would have taken Coleridge up as Gillman did. Some cavillers em to think that Gillman should have been a different sort of man from what he was. But this censure is no more to the point than strictures on an author for not writing a kind of book different from the one he has written. In "The Gillmans of Highgate, with Letters from Samuel Taylor Coleridge," Mr. Gillman has answered all critics in full. Th. letters and reminiscences which he quotes show that Coleridge, the only literary person who had any real interest in the matter, was uniformly content at Highgate. He found in Gillman a thinker who took an interest in philosophy and had independent scientific views, who even took enough pleasure in poetry to see that some of Coleridge's was published. Coleridge's letters, as published here, also attest nis reverence for the character of Mrs. Gillman The only difference between his record of the eighteen years which he spent in the house at Highgate and that of the Gillmans relates to money. He seems to have thought that he gave an equivalent for the care he received. But the only equivalent acknowledged by the family was the satisfaction derived from his companionship and conversation, and from the acquaintance of the distinguished men of letters who visited him. It is apparent-the long period of years proves this-that if there ever was any misunderstanding on this point, it was without bitterness. If Coleridge labored under some delusion he was in-

dulged in it. With the oplum question the case is different. Coleridge, on his own account, and the Gillmans for him, insisted that the habit of taking oplum or laudanum was completely broken. It has always been asserted by others that there was some mistake here. De Quincey, who lived to be resentful toward his old friends of the Lakes, declared with his exaggerating humor that a hogshead of laudanum was taken to the house at Highgate every three months. This sort of accusation defeated itself. But even from so late a work as the collection of Coleridge's letters, edited by Ernest Hartley Coleridge, critics of importance inferred by indirection at least that Coleridge remained to the last a laudanumdrinker. These inferences elicited what is the showed that Coleridge, so far as bodily ailment was concerned, had a far greater occasion for the use of narcotics than was known in the case of De Quincey, that his indolence was not merely a habit, but a necessity, and that he really did quit the use of opium except as medicine. The main feature of the new evidence was the record of an autopsy which showed that Coleridge had suffered for forty years from a disease of the heart. The organ was so nearly worn out that it could The disease had caused a dropsical effusion on the right side of the chest and a complete compression of the lungs. The surgeons who made the autopsy, and, long afterward, other experts, all agreed that the defect of circulation in a chronic case of this kind made the temptation of narcotics almost irresistible. Coleridge took snuff in great quantities at Highgate, and the allowance of opium in unusual prescriptions would have been justified by the investigation after death. But there is nothing in this book to show that even this concession was made to his weakness. The assertion is positive that he obtained no oplum by surreptitious means. Apparently the controversy on the subject is closed with a verdict that for the last eighteen years of his life Coleridge was free from the opium habit.

SOME ARCTIC RESEARCHES.

GREENLAND ICEFIELDS AND LIFE IN THE NORTH ATLANTIC. With a New Discussion of the Causes of the Ice Age. By G. Frederick Wright, D. D., LL. D., F. G. S. A., and Warren Upham, A. M., F. G. S. A. With Numerous Maps and Illustrations. Pp. xv., 407. D. Appleton & Co.

MANDBOOK OF ARCTIC DISCOVERIES. By A. W. Greely, Brigadier-General, United States Army, Chief Signal Officer of the Army, Pp. z., 257. Boston: Roberts Brothers. (Columbian Knowledge Series, Edited by Professor Todd.)

The book of Professor Wright and Mr. Upham is a result of the cruise of the unfortunate steamer Mirands, in 1894. What was meant to be a pleas-ant summer excursion in Arctic regions turned out disastrously. First the Miranda in a fog ran into an iceberg, and had to put back to St. John's for repairs. Finally, on the coast of Greenland, the steamer ran upon a reef, and a few days later had to be abandoned, the party of travellers and the ninety-one persons in all, crowding into a schooner built for twenty. In this diminutive oraft they made their way to Sydney, Nova Scotia. In spite of these mishaps, Professor Wright was enabled to see much of the Esquimaux on the Labrador coast and in lower Greenland, as well of icebergs and glaciers. This book is hardly one which he would have written if he had been permitted to devote the summer wholly to adentific work, but still it casts light on some of the mysteries of ice-making in the far North. It has the advantage also of the intimate study of glacial action made by Mr. Upham.

Most persons probably think that Greenland's wast less can is just what was to be can in the study of the can is just what was to be can in the study of the can in the study of the can be supplied to the ca

Most persons probably think that Greenland's vast ice cap is just what was to be expected so near the North Pole. But the authors of this book show that it is a unique feature. Comparatively few glaciers are found now in countries that lie as far north as a large part of Greenland. A few are found in Alaska, a few on the west side of Baffin's found in Alaska, a few on the west side of Baffin's Bay, here and there one in Northern Scandinavia and Lapland. Agriculture is a profitable pursuit in Russia and Finland, on lines of latitude far above Greenland's Cape Farewell. The effect of the Guif Stream directly on Europe, and indirectly by cold counter-currents on Greenland, the failure of the warm Pacific currents to make their way through the narrow Behring Strait and other considerations point, according to this book, to the general theory that the ancient glacial period was due to changes in the relative sea level. These changes directed the course of warm currents. The comparative shallowness of the northern seas

made very slight changes of level important. The present indications in Greenland also point to successive oscillations in the height of the land. As soon as a plain or a line of hills rose above the line of perpetual snow, they began to store up the water from the sea, in the end capping the whole hemisphere to a point far below the Arctic circle with ice. But the very weight of this ice tended to depress the risen land, while the lowered sea level invited the water from the tropics. With sugwork out a glacial theory of his own. He will in! in General Greely's book less on this the but for its length a strikingly complete summary of Arctic research from its beginnings to the pres ent day. The work is not only a narrative, but ar argument from results in reply to those who condemn all expeditions to the frozen zones as useless. Both these volumes are illustrated, that of Professor Wright and Mr. Upham by numerous copies of photographs, and that of General Greely by a large number of maps beginning with "Shake speare's New Map," dated 1600.

NEW RELIGIOUS BOOKS.

A little book, entitled "Uncle Sam's Church, His Creed, Bible and Hymn Book," by John Bell Bou-ton (Lamson, Wolffe & Co.), will be acceptable to many people just now, for it is a fervid appeal to American patriotism. The author believes that a National patriotic cult ought to be established to supply the place of an impossible State religion; and to bring this about, he would issue tracts telling stories of American patriotism, good maps of the United States, and the patriotic songs of the country. He also proposes that the 69,000 postoffices of the country be used for the active preparation of the cult of patriotism. His ideas are somewhat exuber-ant, but his contention that patriotism is a fundamental virtue admits of no dispute.

Macmillan & Co. bring out an entertaining b of clerical reminiscences, entitled "Dead Leaves and Living Seeds," by the Rev. Harry Jones, Prebendary of St. Paul's and Chaplain-in-Ordinary to the Queen. It gives a graphic picture of the life of an Anglican clergyman in the city and country, and ntains many good stories illustrative of English life. The author appears to be a typical English parson, and possessed of a considerable sense humor, which prevents him from taking himself at all times with too much seriousness.

Another book of similar character, but of a higher literary grade, and much more interesting to Americans, is "Reminiscences," by Bishop Thomas M. Clark, of Rhode Island (Thomas Whittaker), which gives some charming pictures of the Protestant Episcopal Church in the earlier years of the present century. The Bishop has occupied a place commanding influence in the Episcopal Church for many years, and in addition to his spiritual and intellectual qualifications for the office he holds, he meets fully the qualification laid down by St. Paul he has the good report of those outside the Church. The book contains many graphic steries and character sketches, and is full of light and sunshine.

"Monasticism, Its Ideals and Its History," Adolf Harnack, D. D., professor of church in the University of Berlin (Christian Literature Company), is an admirable pen and ink sketch of an institution which has played a large part in the history of Christianity. The translation, which is made by the Rev. Charles R. Gnoert, librarian of the Union Seminary, of this city, is smooth and

a large octavo volume entitled "The Triumphs of the Cross," by E. P. Tenney, with special chapters by a large number of eminent Christian writers. The book is entirely popular in style and aims to show the supremacy of Christianity as an uplifting moral force. It is embellished by three hundred and twenty-five illustrations taken from photographs and works of art by famous masters. It contains a great many interesting miscellaneous facts about persons and places that will make it welcome in homes when a large library is not to be had.

"Risen With Christ," by the Rev. Dr. A. J. Gor don (Fleming H. Revell Company), is a suggestive address on the resurrection. Two other booklets brought out by the same publishers are, "One of the Sweet Old Chapters," by Rose Porter, and "Where Kitty Found Her Soul," by Mrs. J. H. Walworth, two well-told little religious stories for

"The Rev. John Henry," by Percival R. Benson (A. S. Barnes & Co.), is a religious story written to emphasize the fact that there are certain eviland abuses in the modern social system. The author believes that the Church is not doing as much as it ought to bring about a better state of

While "A Scientific Demonstration of the Puture Life," by Thomas Jay Hudson (A. C. McClurg & Co.), is not exactly what its title declares it to be, it is, nevertheless, a suggestive and helpful er, and has read widely and to good purpose in the lines of thought covered by his thesis.

In a little book entitled "Nature and Delty" (Chicago, Charles H. Kerr & Co.), Frederick Meakin gives a carefully thought out study of religion as a quest for the ideal. Starting from the point of view of pure naturalism, he aims to show that religion is the ideal expression of what we call natural law, and that, in fact, the moral law is a natural law. The theme is by no means original, but the author develops in it an interesting way. The same publishers bring out the second volume of the Rev. Dr. John Milton Williams's "Rational Theology." which discusses with great clearness and vigor some of the features of systematic theology. The author, who accepts the new school or free-will system of theology, sets out to show that Calvinism is now in harmony with the teachings of the Bible. As a popular exposition of the subject discussed, the work will be found useful.

Gay Brothers & Co., of this city, bring out a handsomely illustrated book, entitled "Rays of Light From All Lands," edited by the Rev. E. C. Towne, the Rev. Dr. A. J. Canfield and Georgie J. Hagar. It gives in an interesting and popular style a history of the Bibles and beliefs of mankind, and is, in its way, an encyclopedia of religious knowledge.

Legal Notices.

1890.

We, the undersigned Commissioners of Estimate in the above-entitled matter, appointed pursuant to the provisions of chapter 191 of the Laws of 1888, as amended by chapter 25 of the Laws of 1890, hereby give notice to the owner or owners, leasee or leasees, parties and persons respectively entitled to or interested in the lands, tenements, hereditaments and premises, title to which is sought to be acquired in this proceeding, and to all others whom it may concern, to-wit:

First—That we have completed our estimate of the laws.
